

Juan García Moreno

Computer Engineering Graduate | Python · Machine Learning · AI · Linux

Córdoba, Spain • jugarmor014@gmail.com • 606 64 98 21 • wanakox.github.io • juan-garcía-moreno • Wanakox

Summary

Computer Engineering graduate from the University of Córdoba interested in machine learning, neural networks and computer vision. Studied neural networks and pattern recognition during an Erasmus exchange in Greece and gained introductory hands-on experience with Neurolab. In the IntubIA hackathon project, designed Raspberry Pi-based hardware and built the PyQt5 interface for an AI-assisted prototype; a teammate developed the model. Also developed a FastAPI and PostgreSQL application. Seeking an entry-level AI/ML or software engineering opportunity with room to develop practical ML skills. Open to remote opportunities across Spain and relocation to Madrid. Available immediately.

Technical Skills

Languages: Python, SQL, C, C++, Java, Bash

AI & prototyping: Neural networks and pattern recognition (introductory), Neurolab, PyQt5, Raspberry Pi 5

Software & infrastructure: FastAPI, REST APIs, PostgreSQL, Docker, Linux, Git, GitHub

Projects

IntubIA — University Hackathon – Córdoba, Spain

Mar 2025

- Second place in a three-person team working with IMIBIC on a prototype assessing potential intubation difficulty from a facial photograph and patient attributes including age, BMI, sex and jaw width.
- Designed the hardware setup using Raspberry Pi 5, touchscreen LCD and Camera Module 3; built the PyQt5 interface and integrated it with the prototype. A teammate developed the computational model.

TripPlanner — Final Degree Project

- Built a travel planning application with FastAPI REST APIs, PostgreSQL, JWT authentication and Docker Compose.
- Structured the backend into routes, services, repositories and schemas and integrated external services.

Education

BSc University of Córdoba, BSc in Computer Engineering – Córdoba, Spain
Specialization: Software Engineering. Final Degree Project: TripPlanner.

Sept 2022 – Sept 2026

Hellenic Mediterranean University, Computer Science (Erasmus Exchange) – Heraklion, Greece

Sept 2025 – June 2026

Coursework in neural networks and pattern recognition, including introductory practice with Neurolab; also studied computer systems security.

Additional Experience

University Student Collaborator

- Configured a Linux environment and a virtualization server for academic work.

Languages

Spanish: Native

English: B1 (Cambridge certification; academic exchange in English)
