

Juan García Moreno

Computer Engineering Graduate | Python · C/C++ · FastAPI · Java · Linux

Córdoba, Spain • jugarmor014@gmail.com • 606 64 98 21 • wanakox.github.io • juan-garcía-moreno • Wanakox

Summary

Computer Engineering graduate from the University of Córdoba, focused on backend development and Linux systems. Built a travel planning application with FastAPI, PostgreSQL and Docker, including REST APIs, authentication and background jobs. Erasmus exchange in Greece, studied neural networks and pattern recognition, gaining introductory experience. Interested in machine learning, AI and convolutional neural networks. Open to remote opportunities across Spain and relocation to Madrid. Available immediately.

Technical Skills

Languages: Python, C, C++, Java, SQL, Bash

Backend: FastAPI, REST APIs, SQLAlchemy, Pydantic, JWT

Databases & Infrastructure: PostgreSQL, MySQL, Docker, Docker Compose, Linux, Git, GitHub

Projects

TripPlanner — Final Degree Project

- Built a travel planning application with a FastAPI REST, JWT authentication backend, PostgreSQL persistence and a React/TypeScript frontend.
- Structured the backend into routes, services, repositories and schemas; added containerized deployment with Docker Compose.

IntubIA — University Hackathon – Córdoba, Spain

Mar 2025

- Awarded second place in a three-person team developing a prototype with IMIBIC to assess potential intubation difficulty from a facial photograph and patient attributes such as age, BMI, sex and jaw width.
- Designed the hardware setup, built the user interface with PyQt5 and integrated it with the prototype.

Sports Event Ticketing System

- Built a Java and MySQL console application for events, tickets, payments and refunds using MVC, DAO and DTO patterns.

Education

BSc	University of Córdoba , BSc in Computer Engineering – Córdoba, Spain Specialization: Software Engineering. Final Degree Project: TripPlanner.	Sept 2022 – Sept 2026
------------	---	-----------------------

	Hellenic Mediterranean University , Computer Science (Erasmus Exchange) – Heraklion, Greece Studied neural networks, pattern recognition and computer systems security	Sept 2025 – June 2026
--	--	-----------------------

Additional Experience

University Student Collaborator

- Configured a Linux environment and a virtualization server for academic work.

Languages

Spanish: Native

English: B1 (Cambridge certification; academic exchange in English)
